1. Introduction

Developments to our questionnaires reflect and drive best practice, and improve both data quality and the disclosure experience. CDP has sought to stabilize the climate change questionnaire for 2020 as much as possible.

This document includes two tables:

- ▼ The first indicates where 2020 questions differ from the 2019 questionnaire, due to a minor change, modification, or a development.
- ▼ The second sets out the structure of the 2020 questionnaire, shows which questions form the minimum version of the questionnaire, and indicates the linkages between questions. It presents a list of the modules and questions.

The 2020 climate change questionnaire, including sector questions and the reporting guidance, can be viewed at www.cdp.net/en/guidance.

Summary of 2020 changes to the climate change questionnaire

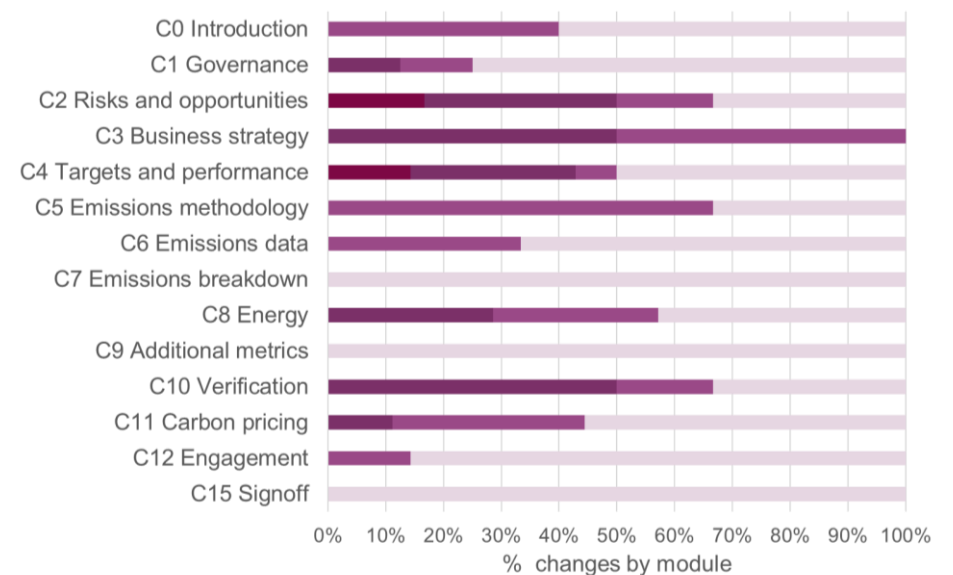

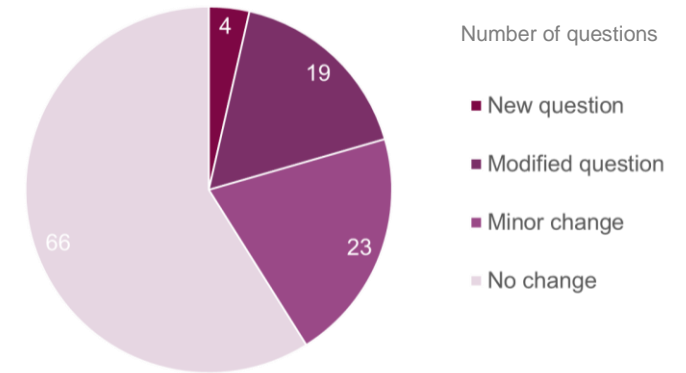

80% of the questions in the 2020 climate change questionnaire have either no change or minor changes. A total of 19 questions are modified from their 2019 counterparts. Note that some questions in the climate change questionnaire will not appear for certain sectors in 2020. These are detailed in table 3.

The figures opposite show the magnitude of changes within each module.

Summary of 2020 changes to sector specific questions

New sector questions have been introduced for the following sectors: Capital goods (8 questions), Construction (10 questions), Financial services (27 new questions and 23 removals, providing a net increase of 4 questions), and Real estate (12 questions). 7 questions have been removed for Electric utilities.

There have also been some other changes and modifications which are detailed below.
