STOXX® Low Carbon Indices provide easy new way to climate-friendly and attractive returns

Performance STOXX Global Climate Change Leaders vs. STOXX Global 1800

Our Climate A List
comprises a strong set of
companies who lead on
climate change mitigation
today and in the future.
It is exciting to see the
rising investor interest
in the STOXX® Global
Climate Change Leaders
Index.

This year CDP collaborated with STOXX® and South Pole Group on the development of a new series of low-carbon indices, one of which now makes investing in CDP's A List companies very easy: The STOXX® Global Climate Change Leaders Index.

STOXX® Climate Change Leaders Index is the first ever that tracks the CDP "A List" available to market participants offering a fully transparent and tailored solution to address long-term climate risks, while participating in the sustainable growth of a low-carbon economy.

The index has performed strongly against a global benchmark, outperforming by 6% over 4 years.

Being based on the CDP "A List" database, this unique index concept includes carbon leaders who are publicly committed to reducing their carbon footprint.¹

Key benefits for investors:

- Constituents are forward-looking leaders with superior climate change mitigation strategies and commitments to reducing carbon emissions
- In addition to Scope 1 & Scope 2, also incorporates Scope 3 data
- Significantly (80%) lower carbon footprint¹ while still containing high emitters
- Similar risk-return profiles compared to the benchmark
- Use reported carbon intensity data only

CDP is looking forward to contributing to innovative solutions that can add real value for investors in the future.

¹ The index is price weighted with a weight factor based on the free-float market cap multiplied by the corresponding Z-score carbon intensity factor of each constituent. Components with lower carbon intensities are overweighted, while those with higher carbon emission are underweighted.
