About CDP:

CDP, formerly Carbon Disclosure Project, is a global not-for-profit that drives companies and governments to reduce their greenhouse gas emissions, safeguard water resources and protect forests. Voted number one climate research provider by investors and working with institutional investors with assets of over US\$106 trillion, CDP leverages investor and buyer power to motivate companies to disclose and manage their environmental impacts. In 2020, over 10,000 companies, cities, states and regions disclosed environmental data through CDP, making CDP's platform one of the richest sources of information globally on how companies and governments are driving environmental change.
